

# Four modules.

# One loop.

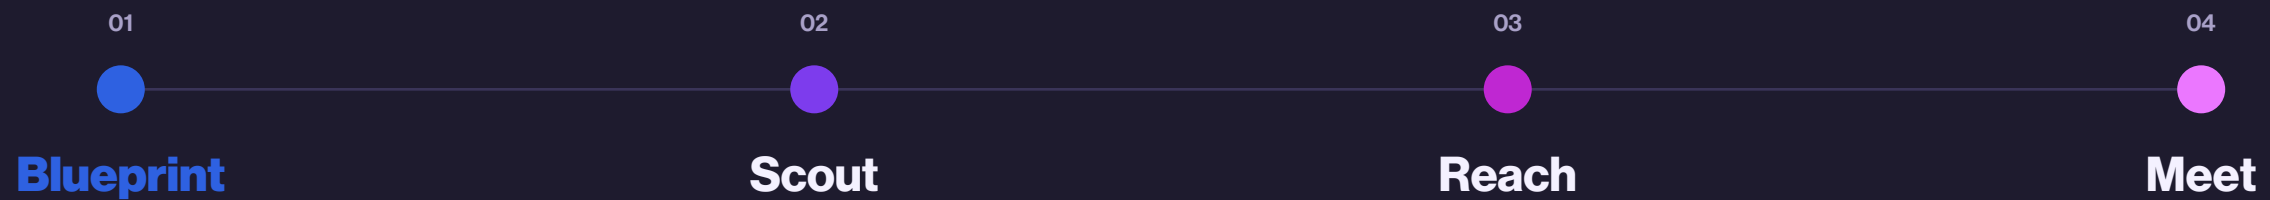

Blueprint scopes the role. Scout finds the people. Reach starts the conversation. Meet books the call. The recruiter stays in the loop.

# Blueprint.

**Vacancy to brief in 15 minutes.**

Pulls search specs, company DNA, and a structured intake into one document the team can ship.

# How Blueprint works.

## 01 Pulls vacancy + company signal

Intake from text, calls, or job board URLs into one structured brief.

## 02 Maps the role to the team

Sees how the role fits adjacent profiles, exposes scope and pay gaps before sourcing.

## 03 Outputs a brief the team can ship

One source of truth for Scout, Reach, and Meet. No drift.

# What Blueprint ships.

A live fragment from the product. Real fields, real shape, real handover.

## INTAKE FRAGMENT

## BLUEPRINT

**Role:** Senior Backend Engineer

**Stack:** Python / Postgres / AWS

**Must:** 5y+ distributed systems

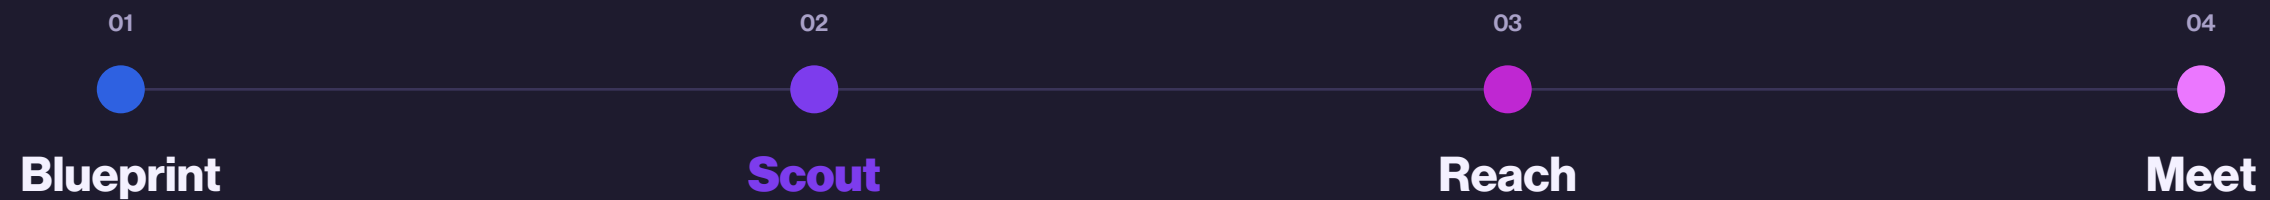

**Nice:** open-source contributions

**Pay:** EUR 75-95k, hybrid Haarlem

# Scout.

**Finds, verifies, ranks across 130+ sources.**

Three-layer scoring: signal density, role fit, company match. The recruiter sees ranked shortlists, never raw lists.

# How Scout works.

## 01 130+ data sources, one index

LinkedIn, ATS, niche communities, alumni lists, GitHub. One ranked output.

## 02 Three-layer scoring

Signal density, role fit, company match. Each layer transparent and tunable.

## 03 Ranked shortlists, not lists

Recruiter sees the top 20 with reasons. Never 4,000 LinkedIn profiles in a CSV.

# What Scout ships.

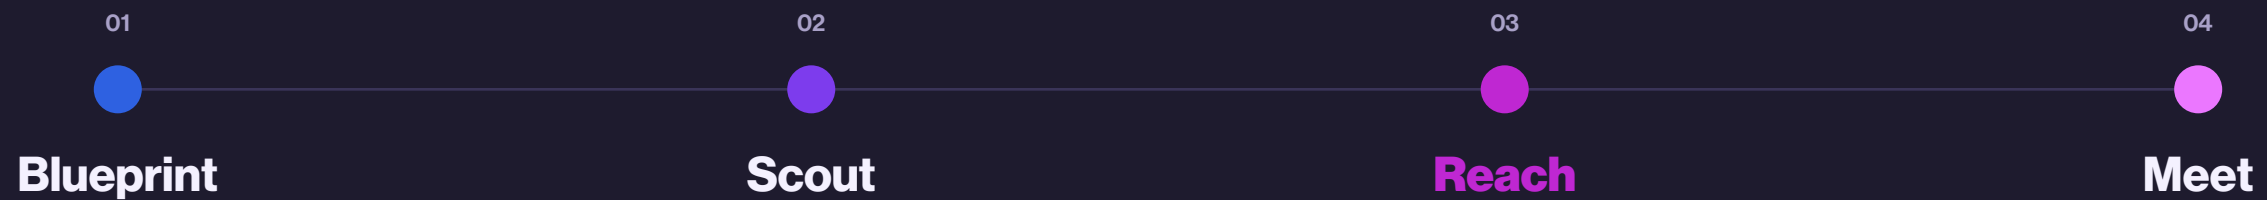

A live fragment from the product. Real fields, real shape, real handover.

CANDIDATE SCORING FRAGMENT	SCOUT
Emma R. score 94 match high	
Jasper V. score 91 match high	
Sofia K. score 87 match medium	
Tom de Wit score 82 match medium	
Maud B. score 78 match medium	

# Reach.

## Multichannel outreach in your brand voice.

Email, LinkedIn, SMS. Sequenced, paced, compliant. Voice rules per client, never generic copy.

# How Reach works.

## 01 Multichannel by default

Email, LinkedIn, SMS. Sequenced, paced, deliverability monitored.

## 02 Brand voice per client

Voice rules, banned words, signature blocks. Never generic templates.

## 03 Compliance built in

GDPR, suppression lists, opt-out flow. Auditable at row level.

# What Reach ships.

A live fragment from the product. Real fields, real shape, real handover.

## SEQUENCE FRAGMENT

## REACH

**D 0 Email** Open with role + name reason

**D 2 LinkedIn** Soft connect, no pitch

**D 5 Email** Add proof, propose 20 minutes

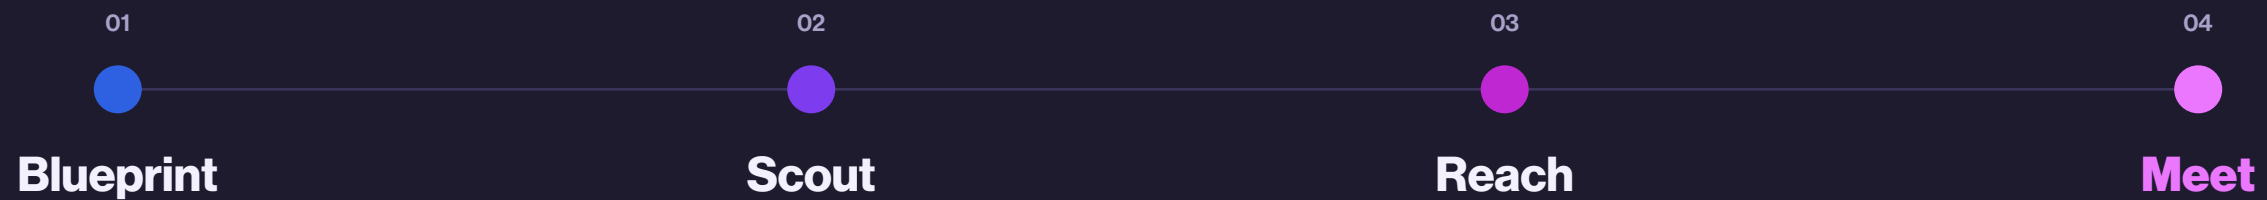

**D 9 LinkedIn** Voice note, 15 seconds

**D 14 Email** Clean exit, parking option

# Meet.

**Books the call. Hands over to the recruiter.**

Calendar sync, brief auto-shared, intake notes attached. Zero copy-paste, all signal.

# How Meet works.

## 01 Calendar sync, no friction

Two-way sync with Google + Outlook. Buffer rules, time-zones, conflicts handled.

## 02 Brief auto-attached

Recruiter walks into the call with the full Blueprint + Scout context.

## 03 Clean handover

Notes pushed back to the ATS. Loop closes cleanly, next role inherits the signal.

# What Meet ships.

A live fragment from the product. Real fields, real shape, real handover.

## DASHBOARD FRAGMENT

## MEET

# We match. You hire.

Four modules in one loop. Built to hire with you, never for you.
